ArUco markers - printing instructions

4 markers, DICT_4X4_50, IDs 0-3. Each black square must measure exactly 100 mm.

PARA LA PAPELERIA (mostrar esta pagina)

Por favor imprimir en TAMANO REAL / ESCALA 100%.

NO usar "ajustar a la pagina" ni "fit to page" ni "reducir/ampliar".

Papel blanco MATE (no brillante). Impresion en blanco y negro esta bien.

Tamano carta. Imprimir 4 paginas (una por cada marcador).

Before you leave the shop

1. Measure the 100 mm reference line on any printed page with a ruler.
2. If it is not 100 mm, the printer rescaled. Ask them to reprint at 100%.
3. If it still comes out slightly off, that is fine - but write the measured value down and use THAT number in your code, not 100.
4. Check the paper is matte. Glossy paper reflects room lights and kills marker detection.

At home

Cut along the dashed square. Keep the full white border - do NOT trim close to the black edge, the white quiet zone is required for detection.
Tape all four corners flat. A curled corner introduces pose error.
Place the four markers around the perimeter of your working area, not in the middle, so your hands do not occlude them.

REFERENCE LINE - must measure exactly 100.0 mm

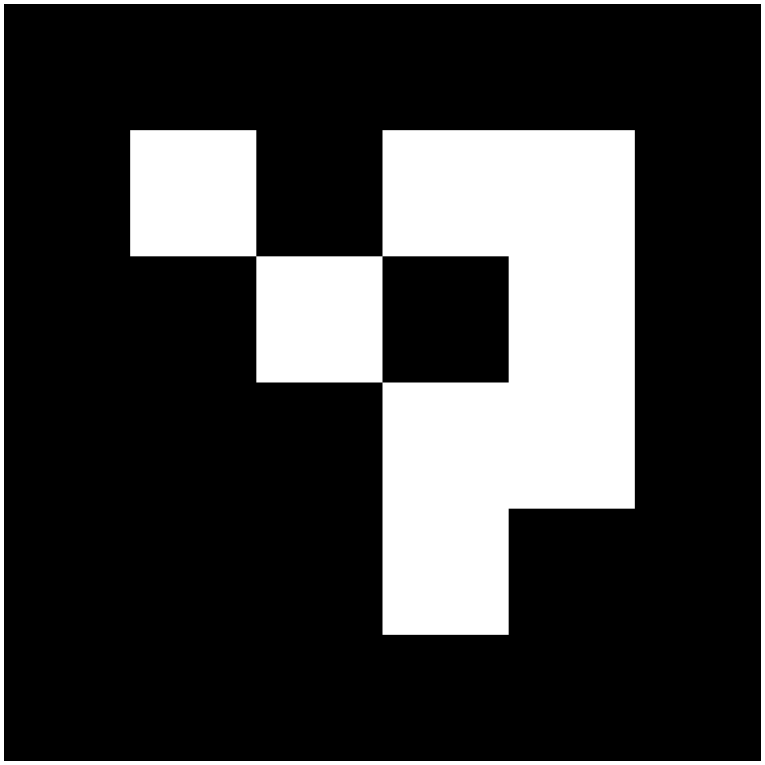

Esta linea debe medir exactamente 100 mm (10 cm)

For the code:

```
dictionary      = cv2.aruco.DICT_4X4_50
marker ids      = 0, 1, 2, 3
marker length   = 0.100  m   (VERIFY WITH A RULER AFTER PRINTING)
detector        = cv2.aruco.ArucoDetector(dict, cv2.aruco.DetectorParameters())
```

ArUco DICT_4X4_50 - ID 0

black square = 100 mm

black square spans 100 mm (measured above the cut line)

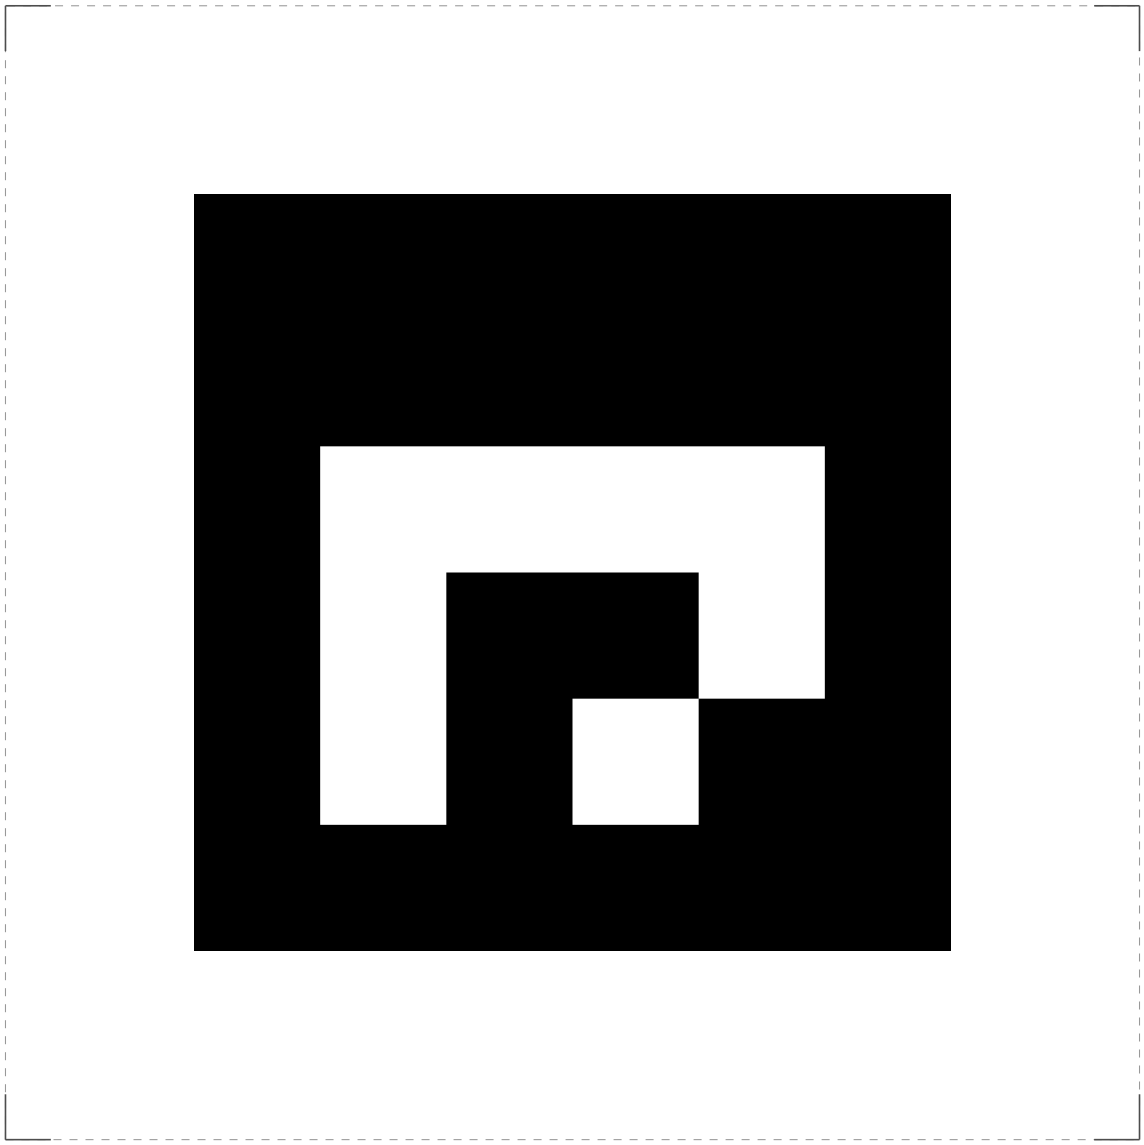

SCALE CHECK - this line must measure exactly 100.0 mm

Esta linea debe medir exactamente 100 mm. Si no, se imprimio mal.

Cut along the dashed line. Keep the white border. Tape flat, all four corners.

ArUco DICT_4X4_50 - ID 1

black square = 100 mm

black square spans 100 mm (measured above the cut line)

SCALE CHECK - this line must measure exactly 100.0 mm

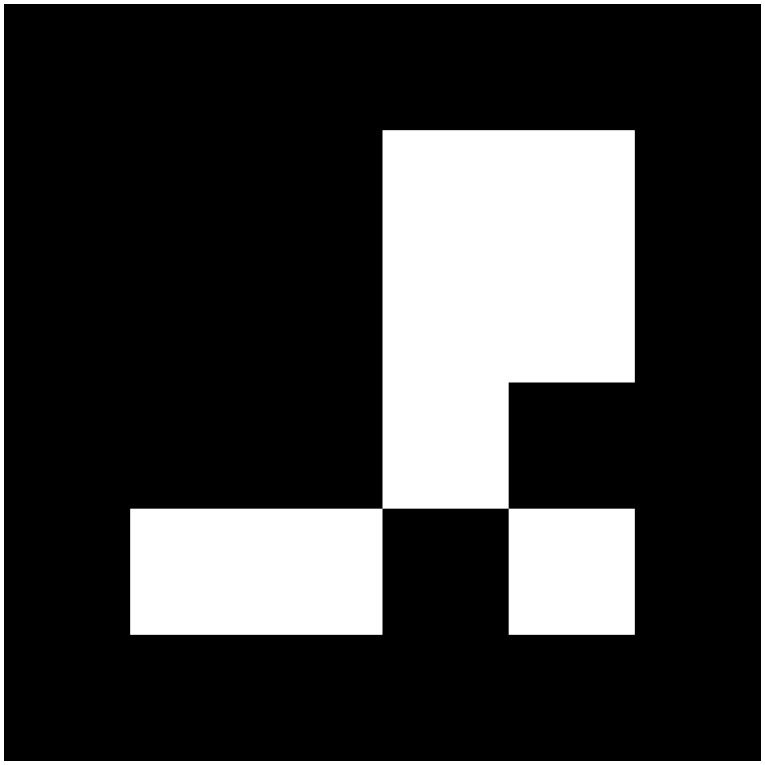

Esta linea debe medir exactamente 100 mm. Si no, se imprimio mal.

Cut along the dashed line. Keep the white border. Tape flat, all four corners.

ArUco DICT_4X4_50 - ID 2

black square = 100 mm

black square spans 100 mm (measured above the cut line)

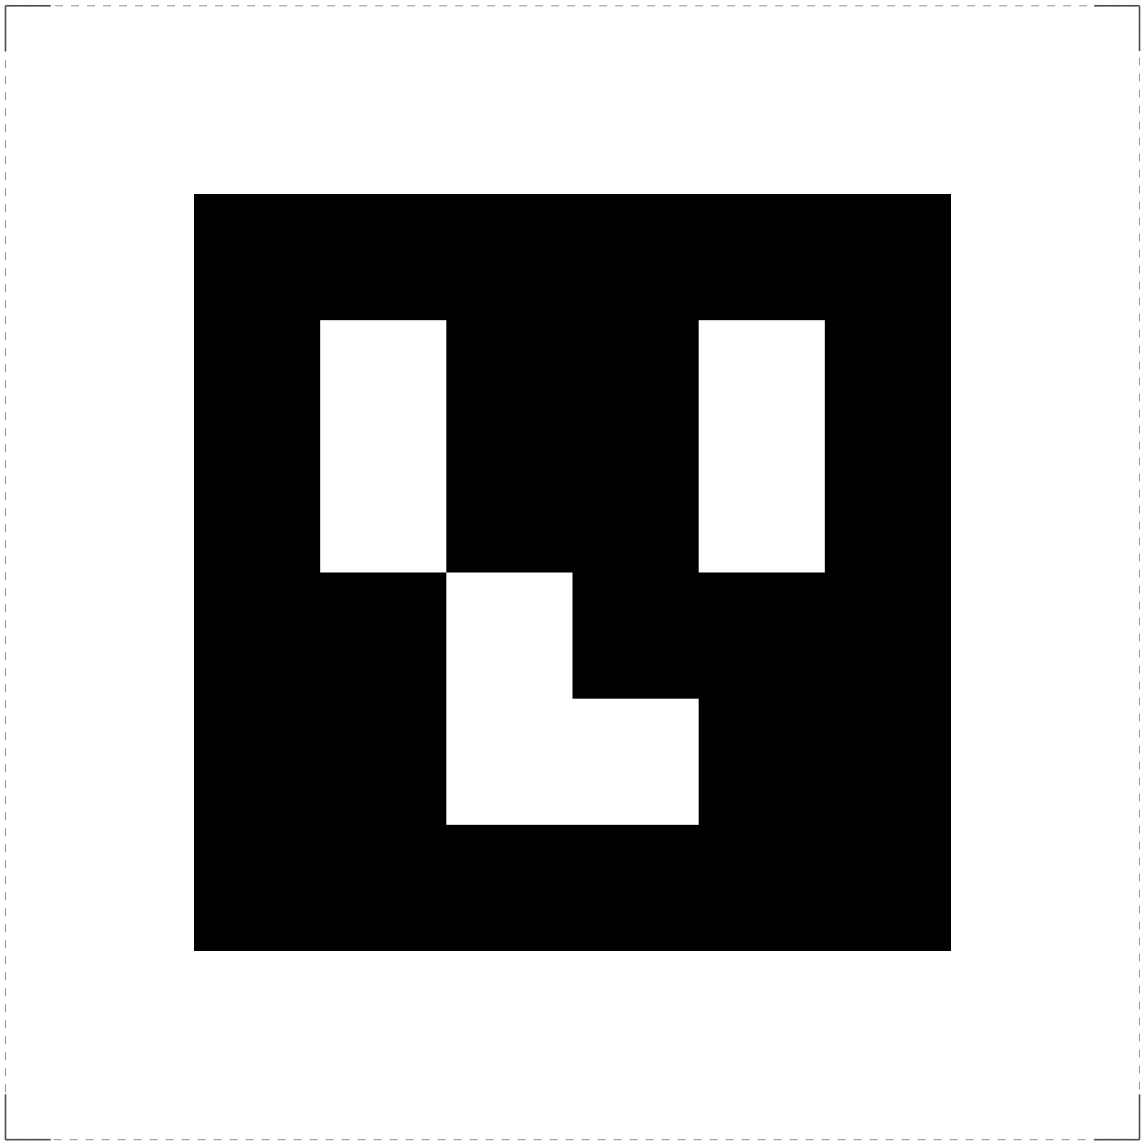

SCALE CHECK - this line must measure exactly 100.0 mm

Esta linea debe medir exactamente 100 mm. Si no, se imprimio mal.

Cut along the dashed line. Keep the white border. Tape flat, all four corners.

ArUco DICT_4X4_50 - ID 3

black square = 100 mm

black square spans 100 mm (measured above the cut line)

SCALE CHECK - this line must measure exactly 100.0 mm

Esta linea debe medir exactamente 100 mm. Si no, se imprimio mal.

Cut along the dashed line. Keep the white border. Tape flat, all four corners.
