Table setup sheet - 70 x 120 cm table, 1:1 scale

Distances from the NEAR edge (where you sit) and the LEFT edge. Smaller "from LEFT" = further left. Markers first, then the objects.

LAYOUT A - 50 episodes, 10 at each of 5 bowl positions

LAYOUT B - 10 push episodes (same markers, objects moved)

item	from NEAR edge	from LEFT edge	(from RIGHT)
MARKER ID 0 near-RIGHT	218 mm	975 mm	225 mm
MARKER ID 1 near-LEFT	218 mm	225 mm	975 mm
MARKER ID 2 far-LEFT	483 mm	225 mm	975 mm
MARKER ID 3 far-RIGHT	483 mm	975 mm	225 mm
PLATE target, NEVER MOVES	268 mm	675 mm	525 mm
chunk 1 A_t2 bowl	402 mm	475 mm	725 mm
chunk 2 A_t0 bowl	378 mm	675 mm	525 mm
chunk 3 A_t8 bowl	318 mm	785 mm	415 mm
chunk 4 A_t1 bowl	508 mm	795 mm	405 mm
chunk 5 A_t6 bowl	198 mm	405 mm	795 mm
push: plate start	278 mm	455 mm	745 mm
push: goal zone centre	378 mm	685 mm	515 mm
push: obstacle box	378 mm	605 mm	595 mm

SMALLER "from LEFT" = FURTHER LEFT. The two lateral columns always add to 1200 mm -- use that as a check.

Blue rows: the four ArUco markers. Tape flat, all four corners down.
Pink row: the PLATE. It never moves, in any of the 50 episodes.
Cream rows: the 5 chunks. Between chunks you move ONLY the bowl, to the position on that row.
Orange rows: layout B, the 10 push episodes. Move the plate, add the small box, remove the bowl.

Markers are INSET, not at the corners: 14.2 cm from near/far, 15.0 cm from left/right.
Check the marker rectangle before taping anything else: 265 mm short side, 750 mm long side, 795 mm diagonal.
If the diagonal is wrong the rectangle is not square.

Mark object positions with a small pencil cross or a dot of masking tape -- NOT anything that covers a marker.
Minimum clearance between any object and any marker tile is 57 mm; keep it.
